

## **MonoScan®, Solid AT's non-contact, ultrasonic level gauging device is now ATEX and Ex certified**

**Tel-Aviv, Israel, April 24, 2003** --- Solid Applied Technologies, Ltd. (Solid AT) a leading provider of ultrasonic and radar level measurement instruments, today announced that it has received the ATEX approval for both EC type examination - EEx ia IIC T4 and Quality Assurance notification for its new revision of MonoScan® and MonoScan 485 non-contact, ultrasonic gauging devices intended for use in potentially explosive atmospheres as per Directive 94/9/EC. The MonoScan® line of products now feature a housing material that makes them conductive as required by the Ex approval. The ATEX approval was given for both MonoScan® and MonoScan485 devices. The MonoScan® product line is ideal for use in liquids, solids and open channel flow applications and is known as the world smallest open channel flow gauging device.

Solid AT has been assessed for intrinsic safety protection concepts as well as for equipment categories. The ATEX certification of quality confirms that Solid AT product production operates under appropriate quality system to meet global standardization.

The Ex approval will allow Solid AT to supply safe level measurement solutions for hazardous areas such as acidic liquids, flammable gases and vapors and for many applications in the oil, petrochemical, wastewater and petroleum industries. Moreover, Solid AT' products are equipped with sophisticated compensation tool which enables their usage in heavy and very flammable vapors surroundings such as: Naphtha, Toluene, Acetone and other.

### **About Solid Applied Technologies:**

Solid Applied Technologies designs, develops, manufactures, markets and services sophisticated level measurement and gauging systems. The Company is a world leader in ultrasonic level measurement systems for liquids and for solids, The Company's innovative ultrasonic, and radar technologies enable customers to achieve the accuracy and repeatability essential to remaining at the forefront of inventory and process tanks monitoring. Solid's extensive network of distribution and Private Label partners deliver its knowledge and expertise to customers the world over.
